Evening Brief

Date: July 20th, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light-Moderate Initial Attack Activity
National	PL 5	New Fires and Acres: 30 fires for 163.55 acres / 0 acres Large Fire Growth

Weather Summary:

... Wetter Thunderstorms Over the Southern and Eastern Half of the Great Basin Diminishing through the Week ...

... Drier Air and Breezy Winds Returns to Western and Northern Nevada, Idaho and Wyoming this Week ...

High pressure will remain over the Great Basin this week with warm temperatures and smoky conditions continuing in the north and west. Smoke will be most prevalent across northwest Nevada and Western Idaho. Drier air moves into the western Great Basin Wednesday, pushing the remnants of the monsoonal moisture and isolated thunderstorms further eastward over the eastern half of the Great Basin, with increasingly wet storms across southern Utah again later in the week, and a mix of wet and dry lightning across eastern Idaho and Wyoming at times.

Winds will pick up along the Sierra Front Wed and continue through the end of the week with gusts 25-30 mph and lower RH. Winds will also pick up across Central Idaho by mid-week with gusts 25-30 mph Wednesday-Thursday. These drier, breezy conditions will increase the likelihood of holdovers the next few days.

Over the weekend, hot and dry conditions will continue in the northern and central portions of the Great Basin, while more humid conditions and isolated thunderstorms will linger in the far south.

Fuels/Fire Potential:

... Fuels and Fire Behavior Advisory in effect for Idaho, and Northern Portions of Both Utah and Nevada...

Fire danger indices dropped slightly, due to recent increases in RH, clouds/smoke and thunderstorms along with spotty precipitation, but still remain above the 80th-90th percentile across the northern 2/3rds of the Great Basin. However, indices will climb right back up later this week in northern and central areas with the drier air moving in. Fuels in the southern third of the Great Basin have moistened significantly in most areas, with continued moistening in the coming days. The warmer, drier and breezy conditions the next few days will have a good potential to stir up existing fires, as well as new holdovers across Northern portions of Nevada and Utah, into Idaho and Wyoming.

Resources:

Aviation within the Great Basin

- 1 VLAT, 4 LATs, 0 CL-415
- 25 SEATs, 2 FB, 11 AA, 1 ASM, 1 LP
- 11 Type 1 Helicopters / 11 Comm.
- 7 Type 2 Helicopters / 7 Comm.
- 20 Type 3 Helicopters / 13 Comm.

Crews Committed within the Great Basin

- 12 IHCs / 1 Available / 4 R&R
- 13 Type 2IA / 2 Available / 2 R&R
